Dear Admissions Committee,

Re: Youssef Hassan

I am very pleased to recommend Youssef for admission to your university. While attending my classes, he showed himself as an active and hard-working student. We frequently discussed various physics problems beyond the scope of my course, and I was surprised by his remarkable analytical abilities and originality of his ideas. I have known Youssef for four years. During this period I taught him IGCSE, AS, and A2 Physics courses. As his Physics teacher for four years, I have watched Youssef develop both academically and personally into a mature individual ready in every way for his college years.

Youssef is serious, logical and dedicated. He shows enthusiasm for learning and possesses excellent thinking abilities. His deep-thinking capacity and curiosity for learning have been responsible for his thorough understanding of the physics concepts discussed in class. Youssef always strives to perform to the best of his ability and to improve his knowledge and skills.

Youssef is responsible, sociable, polite and well mannered. He benefits from any positive criticism to keep driving him forward to improve his knowledge. Youssef is easy to work with, serious and confidently calm in the face of difficulties.

In short, Youssef, as an outstanding student, has showed great potentialities in academic learning and excellent communication and organization skills. I strongly recommend him and will appreciate your assistance to his application. Should you need any further information about this promising young man, please feel free to contact me.

I am certain that he will successfully meet all expectations.

Regards,

Mohamad Desouky, PhD
